Capital is at risk. The value and income from investments can go down as well as up and are not guaranteed. An investor may get back significantly less than they invest. Past performance is not a reliable indicator of current or future performance and should not be the sole factor considered when selecting funds. The Fund will be exposed to stock markets and market conditions can change rapidly. Prices can move irrationally and be affected unpredictably by diverse factors, including political and economic events. The Fund will be exposed to smaller companies which are typically riskier than larger, more established companies. Difficulty in trading may arise, resulting in a negative impact on your investment. Shares in smaller companies may be harder to sell at a desired price and/or in a timely manner, especially in difficult market conditions. The Fund invests mainly in the UK therefore investments will be vulnerable to sentiment in that market which may strongly affect the value of the Fund. In certain market conditions some assets may be less predictable than usual. This may make it harder to sell at a desired price and/or in a timely manner. In extreme market conditions redemptions in the underlying funds or the Fund itself may be deferred or suspended.
