Institutional Acc Class (I) - Fund Factsheet - Covering the month of January 2023

Anthony Cross, Julian Fosh, Matthew Tonge, Victoria Stevens & Alex Wedge

The Fund

The process seeks to identify companies with a durable competitive advantage that allows them to defy industry competition and sustain a higher than average level of profitability for longer than expected. Companies in the Fund must have a minimum 3% equity ownership by senior management, which the fund managers believe motivates key employees, helps to secure a company's competitive edge and leads to better corporate performance. The Fund invests at least 90% of the portfolio in companies incorporated, domiciled or which conduct significant business in the United Kingdom (UK).

Key risks: Past performance is not a guide to future performance. The value of an investment and the income generated from it can fall as well as rise and is not guaranteed. You may get back less than you originally invested. The portfolio is invested in smaller companies and companies traded on the Alternative Investment Market. These stocks may be less liquid and the price swings greater than those in, for example, larger companies. Investment decisions should not be based on short-term performance.

^{^^}The amount of income generated for distribution after deducting all expenses. *The fraction of a fund invested differently to its benchmark. A 100% active share is a fund with no holdings in the benchmark, a 0% active share is a fund identical to the benchmark.
