What are the Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. There is no guarantee that the Fund will meet its objective. The Fund does not offer any capital guarantee or protection and you may not get back the amount invested. The Fund is in its risk/reward category because a concentrated investment (the fund holds fewer investments than many other funds) in shares of companies from various European, excluding the UK, countries and sectors has historically been subject to large fluctuations in value. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods. Risks materially relevant not adequately captured by the indicator: **Derivative Instruments risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks. **Equity risk:** prices of equities may be affected by factors such as economic, political, market, and issuer-specific changes. Such changes may adversely affect the value of the equities regardless of company-specific performance. **Foreign Currency risk:** the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations. For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.
