Investment Objective and Philosophy

The Cohen & Steers SICAV Global Real Estate Securities Fund (the "Fund") seeks current income and capital appreciation by investing in a diversified portfolio of REITs and other publicly traded real estate companies located around the world, including both developed and emerging markets. The Fund seeks to identify companies that we believe have superior growth prospects and attractive valuations. We believe the global markets offer the potential for superior returns based on variations in regional economic and property sector cycles, the diversity of business models, the lack of uniform reporting and disclosure standards, and the growing quality of real estate and securitization in many countries. We believe there are alpha generation opportunities for well resourced, disciplined, active managers.

Investment Approach

Cohen & Steers employs an integrated, relative value investment process. A proprietary valuation model ranks global securities on price/net asset value ("NAV") and price/dividend discount model value ("DDM"), which we believe are the primary factors that drive global real estate security values. The company research process includes an evaluation of management, strategy, property quality, financial strength and corporate structure. Judgments with respect to risk management, diversification, liquidity and other factors overlay the model's output and drive the portfolio managers' investment decisions.

Performance returns stated net of fees. There is no guarantee that any historical trend illustrated in this report will be repeated in the future, and there is no way to predict when such a trend will begin. There is no guarantee that any market forecast in this report will be realized. **Current performance may be lower or higher than the performance quoted. The investment return and the principal value of an investment will fluctuate and shares, when redeemed, may be worth more or less than their original cost. Periods less than one year are not annualized. Returns are historical and include change in share price and reinvestment of all distributions.** There is no guarantee that any investment objective will be achieved. If the currency in which the past performance is displayed differs from the currency of the country in which an investor resides, then the investor should be aware that due to the exchange rate fluctuations the performance shown may be higher or lower if converted into the investor's local currency. An investor cannot invest directly in an index, and index performance does not reflect the deduction of fees, expenses or taxes.
